Atlantica Centre for Energy welcomes 4 New Members Cianbro, Deloitte, NB Power & xwave

Stephen MacMackin, Chair of the Atlantica Centre for Energy, is pleased to announce the addition of four new members to the board of the Atlantica Centre for Energy. The Atlantica Centre for Energy will welcome Cianbro, Deloitte, NB Power and xwave to the association at today's annual general meeting.

The Atlantica Centre for Energy is an industry association promoting the sustainable growth of the region's energy sector. The objective of the Atlantica Centre for Energy is to foster partnerships between key stakeholders and the community to encourage broad-based community engagement in energy-related issues and policy development. It aims to act as a community-based resource for expertise, knowledge, and assistance to help make the opportunities associated with the energy hub a reality.

Governments, commercial and industrial leaders and communities throughout Atlantic Canada and New England increasingly understand that the regions are intrinsically linked. "Our regions share a common history, similar cultures and often similar industries that drive our respective economies – energy is today's link that will continue and build upon this historic relationship. Secure, clean energy flows freely across the international border by road, rail and sea, and in pipelines and via transmission lines, bringing both economic and environmental benefits to both neighbouring countries. We are pleased that our membership is even more representative of this fact with the addition our latest members", MacMackin stated.

Company	Board Representative
Cianbro	Andi Vigue
Deloitte	Jeff White
NB Power	Darrell Bishop
xwave	Richard Jones
