

## **THURSDAY NOVEMBER 15<sup>TH</sup>, MONCTON, NEW BRUNSWICK NATURAL GAS SUPPLY 20/20 AND BEYOND**

The Maritimes Energy Association, in partnership with several key stakeholders will sit down to discuss the issues and the future of natural gas in New Brunswick and Nova Scotia - 2020 and beyond.

**Date: Thursday, November 15th, 2018**

**Venue: Crowne Plaza Moncton Downtown, 1005 Main Street**

**Time: 10:00 AM– 1:00 PM**

The Atlantica Centre for Energy continues to believe that New Brunswick must develop its onshore shale resources to remain competitive and viable. Similarly, the Nova Scotia Department of Energy and Mines recently released its Onshore Petroleum Atlas which showcased a potential silver lining, but as we've seen - onshore natural gas development is not without controversy. Reaction has been swift, with voices either denouncing or promoting the need to revisit the legislation in place that installed a moratorium or bans hydraulic fracturing in New Brunswick and Nova Scotia.

We invite you to join us for the next step of this important discussion as we delve further into the subject by enabling robust dialogue on the challenges and opportunities for the future.
